

## Safe Handling of Radiopharmaceuticals

Systems for handling of radiopharmaceuticals are subjected to highest requirements. All of our specialized components show a high degree of material resistance against radioactive substances and aggressive chemicals. In this critical field of application, safety always has top priority, especially due to protection of users and patients. All products can be sterilized by Gamma or EtO.

**We offer:**

- customized filters
- customized pharmaceutical processing lines
- customized synthesis cassettes

**Materials:**

- |        |       |        |        |
|--------|-------|--------|--------|
| ■ PP   | ■ PE  | ■ PVDF | ■ PTFE |
| ■ PEEK | ■ TPE | ■ ABS  |        |
