Medical 4 Life

Company Profile

RoweMed AG

RoweMed AG – Medical 4 Life is an innovative MedTech company. Our focus is on developing and producing customized single use systems for fluid transfer, especially handling of sensitive pharmaceuticals.

R & D

The development of systems is closely coordinated with the customer, from first sketch up to a market-ready product.

Production

We offer injection molding (ISO class 8, GMP D), assembling and packaging under one-roof. In our clean room production facility (ISO class 7, GMP C) in Parchim our employees carry out single-part, small series and automated mass production.

Regulatory Affairs

We offer complete technical documentation according to international regulations and customer requirements, e. g. GMP.

Qualifications and Certificates

Our quality management system is certified according to DIN EN ISO 13485:2016 and certified in accordance with the Regulation (EU) 2017/745 on Medical Devices.

The following product groups are covered by our DIN EN ISO 13485 certificate:

- Infusion Filters / Injection Filters
- Infusions Systems
- Injection Systems
- Transfusion Systems
- Tubing Systems for Infusion, Injection, Nutrition and Transfusion
- Tubing Systems for Angiography, Cardiology and Radiology
- Laserablation Sets
- Autologous Re transfusion Sets
- Tubing Sets / Dental Irrigation Tubings
- Irrigation and Suction Sets for Orthopaedics
- Spikes
- Cover Foil
- Catheter Valves
- Hydrophobic Filters
- Urinary Bladder Puncture Set
- Transfer Systems

Besides fulfilling the DIN EN ISO 13485:2016 standards, we also comply with FDA 21 CFR Part 820.

Customize your Bulk Vial / Reaction Vial

Properties:

- For production, mixing and preparation of radiopharmaceuticals
- You define the design (which bottle shape, volume, cannulas, connections, etc.)
- Various bottle materials (PE, PP, glass, etc.)
- Optional with V-shape for optimized withdrawal / emptying
- Single-packed or double-packed
- Available as sterilized product (Ethylene-Oxide or Gamma)

Customize your Dispensing System

Properties:

- For open vial dispensing (OVD)
- Special needle holder system for closed vial dispensing (CVD) available on request
- You define the design (which filter, needle, syringe, connectors, tubing measurements, etc.)
- Various tubing materials (PUR, PVC, PE, TPE, Silicone, etc.)
- Single-packed or double-packed
- Available as sterilized product (Ethylene-Oxide or Gamma)

Customize your Cassette / Manifold

Properties:

- Handling of various Radiopharmaceuticals e.g. Lutetium (Lu), Gallium (Ga), Fluorine (F)
- You define the design (which manifolds, valves, spikes, connections, tubings, etc.)
- Available with customized PE-lines and color coding
- Single-packed or double-packed
- Available as sterilized product (Ethylene-Oxide or Gamma)

Customize your Hydrophilic & Hydrophobic Filters

Properties:

- Hydrophilic and hydrophobic filters for various applications
- Fluid filters, vent filters
- Available as CE-marked medical device
- Various membrane materials (PES, PET, PA (Nylon), PTFE, PVDF, etc.)
- Various pore sizes (100 μm , 5 μm , 0.2 μm , 0.1 μm , etc.)
- Various housing materials (MABS, PC, PP, etc.)
- Various housing sizes
- Various connections (Luer Lock male, female, tubing port, barb)
- Sterile single-packed or non-sterile bulk-packed

Hydrophilic & Hydrophobic Filters

- Filter Straw for withdrawal and filtration of solutions and drugs from glass ampules
- Compatible with all Luer-Lock connectors
- Visual flow control
- Needle free withdrawal
- Flexible plastic straw
- Customized systems are available
- MABS housing
- Filter diameter 3 mm

* reduces risk of contamination with glass particles

A-6606	MABS	0.7	fLL/mLL	0.2 µm PES	1,000 / 16,000

- Especially for paediatrics
- Integrated venting through a PTFE membrane
- Compatible with all Luer-Lock connectors
- Can be connected to additional systems easily
- Visual drug flow control
- Rotating lock nut
- Filter area 4 cm²

* positively charged nylon membrane with endotoxin retention

RowePhil 25/0.2 (PP)

Properties:

- Hydrophilic dispensing filter with 0.2 µm PES membrane
- With hydrophobic vent filter (0.2 µm PET)
- With vent port for controlled removal of contaminated gas
- Chemical inert PP housing
- Sterile single-packed or non-sterile bulk-packed

Customize your Spike

Properties:

- For repeated withdrawal of solutions, drugs and toxic substances and ventilation of vials and containers
- Easy handling due to ergonomic design
- Low priming volume
- Low piercing forces
- Ventilation filter 0.1 μm PTFE membrane (hydrophobic bacteria filter)
- Optional hydrophobic particle filter (5 μm)
- Optional metal cannula to pierce hard stoppers
- Available as CE-marked medical device
- Sterile single-packed or non-sterile bulk-packed

- For repeated withdrawal of solutions, drugs and toxic substances and ventilation of vials and containers
- Safety snap cap for simple one-hand handling
- Easy handling due to ergonomic design
- Protection against contamination through safety valve (SV)
- Low priming volume
- Low piercing forces
- Ventilation filter 0.1 µm PTFE membrane (hydrophobic bacteria filter)
- Safe vial connection for 20 mm & 32 mm (A-6492) bottle cap
- Prolonged fluid opening ensures a nearly complete emptying of the vials

Availability:

non-sterile / bulk

non-sterile / bulk & sterile / CE-marked

NEW RoweSpike VPC

Properties:

- Allows repeated withdrawal of liquids out of vials
- Adjustable PEEK cannula can be positioned as far as the bottom of the vials
- Secures a nearly 100% emptying
- Hydrophobic 0.1 µm PTFE membrane ensures the ventilation of the vials
- Commercial syringes with standard Luer Lock connectors can be connected

Customize your Extension Lines

Properties:

- Available as CE-marked medical device
- Various materials (PUR, PVC, PE etc.)
- Customizable length and diameter
- Various connections (Luer Lock male, female, barb)
- Sterile single-packed or non-sterile bulk-packed
- Can be connected to additional systems easily
- Compatible standard Luer Lock connectors can be connected
